

Tessellated Mirrors

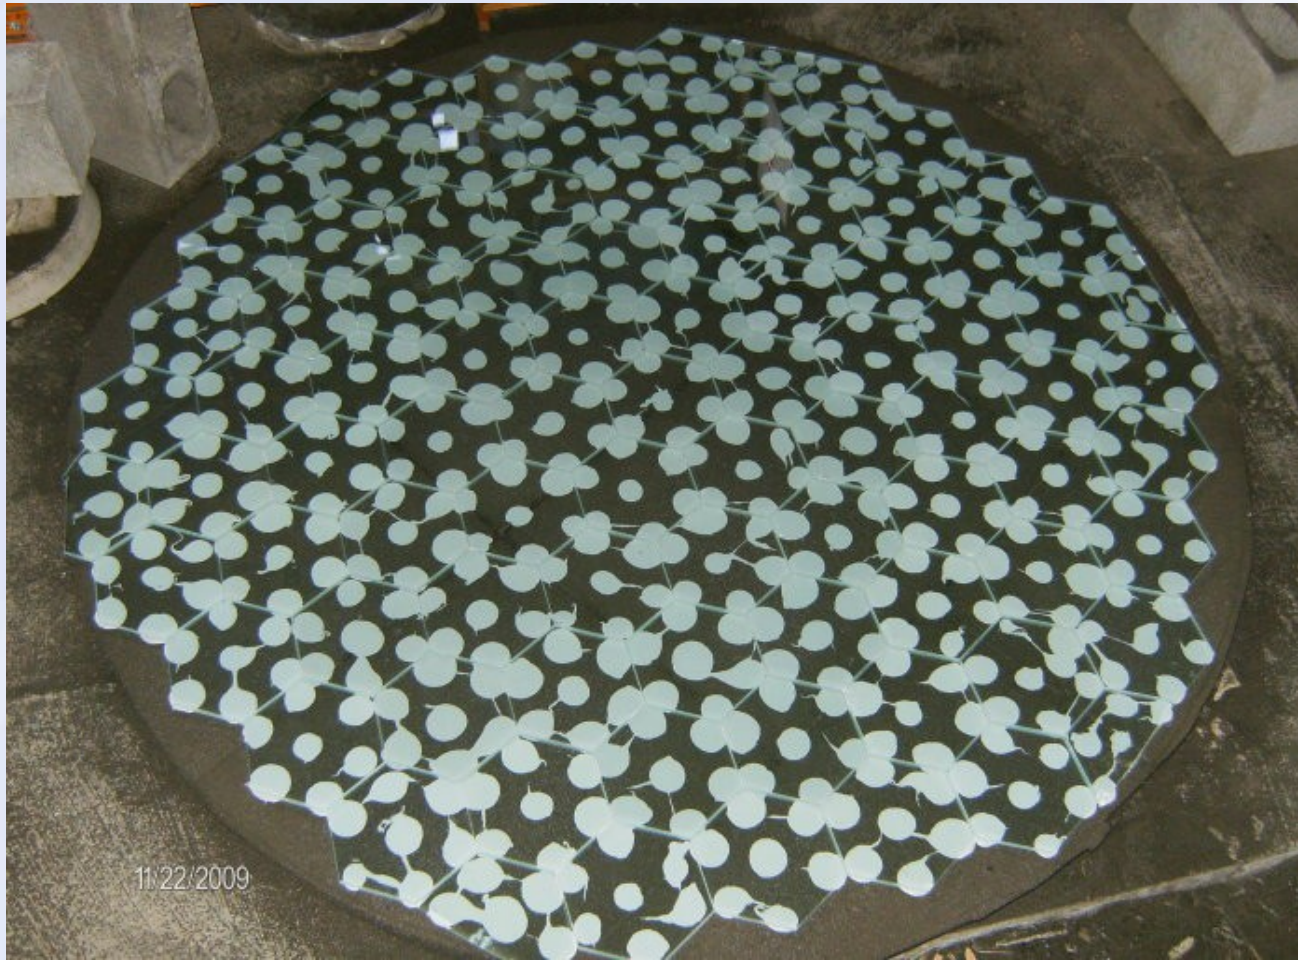

Handling large sheets of glass, in and out of the kiln is dangerous and difficult.

Lost 60 Inch F3

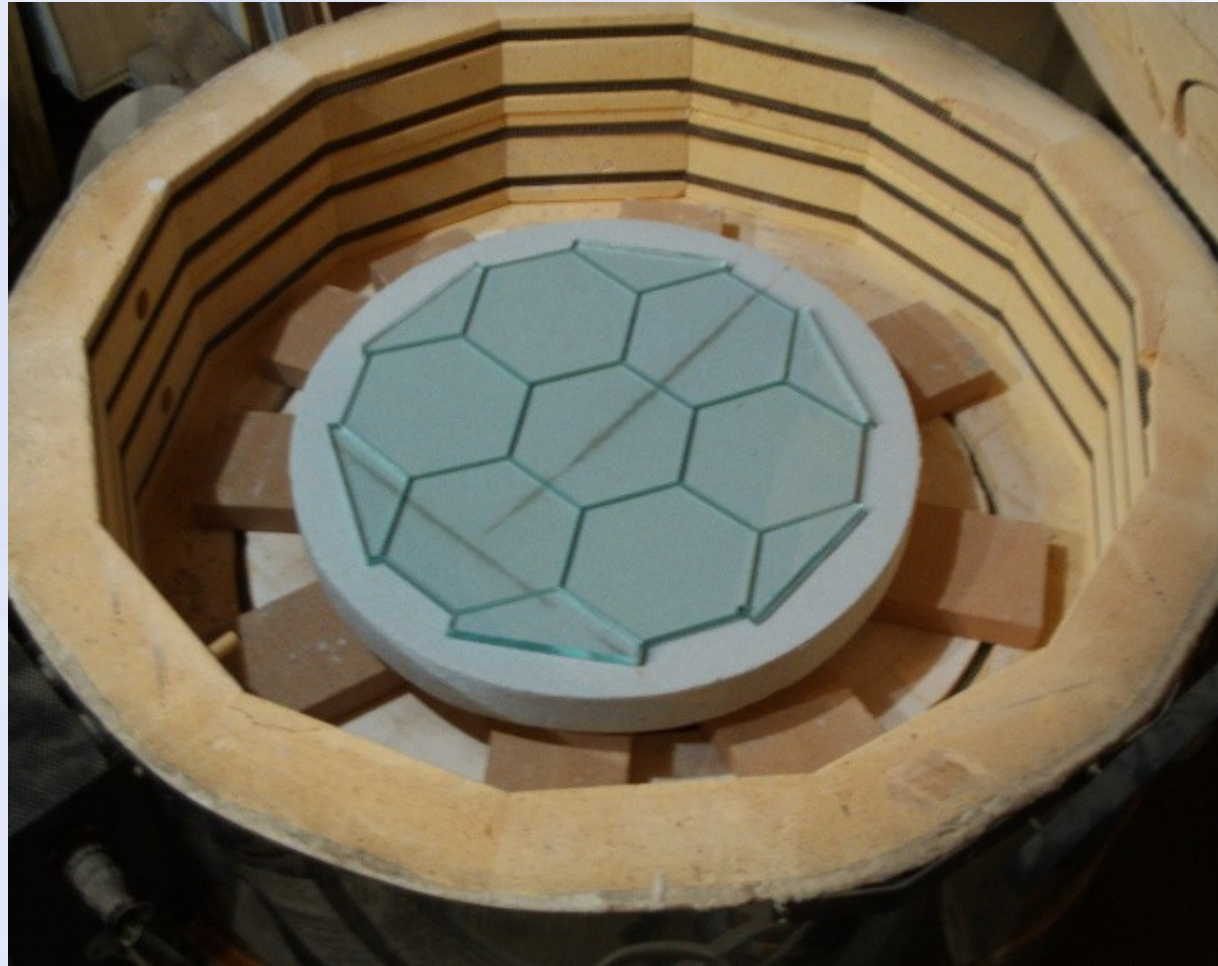

60 inch disk of glass on it's mold. It took two men and a third for positioning to put in in place. It was dropped taking it out.

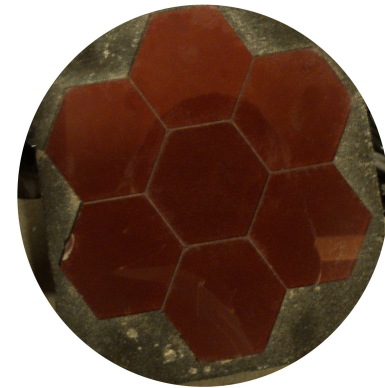

Tessellated Pieces Are Easy to Handle

Fuse Them Together

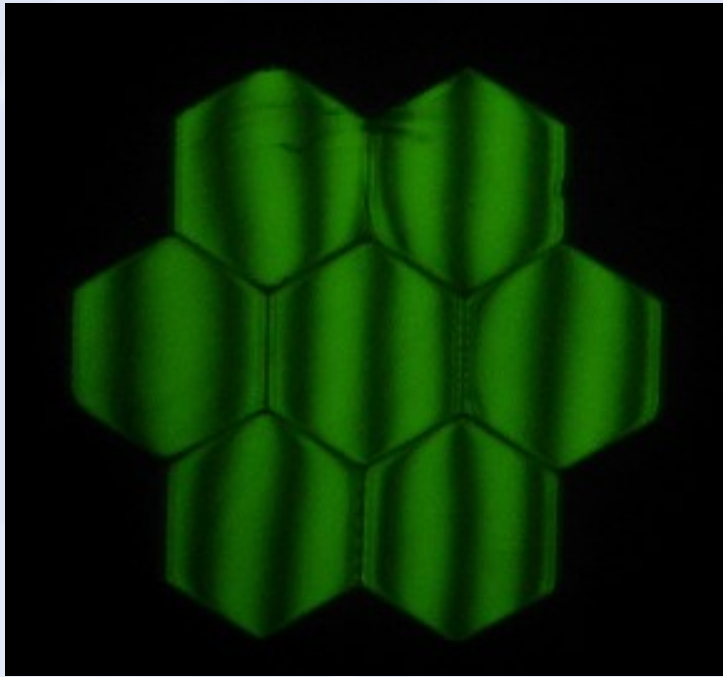

Any Size Can be Done

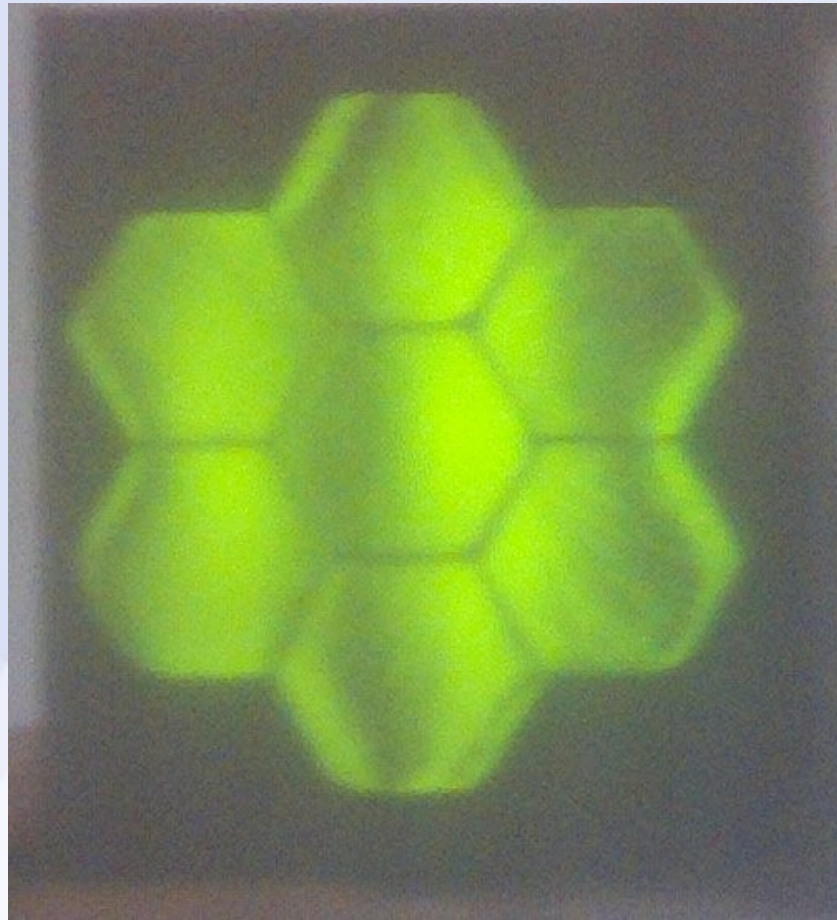

Good Optical Quality

There Are Some Bugs

But They Can Be Solved

You Don't Have to Use Hexagons

The Future? 1.5 Meter and Beyond
